

Flowchart for the transport of frozen colostrum via Loganair Aircrafts and Highlands and Islands Airways

Prior to planned transfer off an Island, it is advisable to contact the admission Board and notify them that the patient will be transferring with frozen colostrum

The patient should ensure that all frozen colostrum is:

- Labelled appropriately
- Bagged in specimen bags

Prior to leaving for the airport the frozen colostrum should be:

- Removed from the freezer and transferred to a insulated cooler bag
- Packed tightly with frozen ice packs and newspapers
- Placed in HOLD luggage

When destination is reached:

- Remove the frozen colostrum and request staff store appropriately within the maternity unit
